ACT OF INCORPORATION,

ACT No. II. OF 1857.

Passed on the 24th January, 1857.

AN ACT TO ESTABLISH AND INCORPORATE AN UNIVERSITY AT CALCUTTA.

Preamble.

WHEREAS, for the better encouragement of Her Majesty's subjects of all classes and denominations within the Presidency of Fort William in Bengal and other parts of India in the pursuit of a regular and liberal course of education, it has been determined to establish an University at Calcutta, for the purpose of ascertaining, by means of examination, the persons who have acquired proficiency in different branches of Literature, Science and Art, and of rewarding them by Academical Degrees, as evidence of their respective attainments, and marks of honor proportioned thereunto; and whereas, for effectuating the purposes aforesaid, it is expedient that

such University should be incorporated: It is enacted as follows: (that is to say)—

HENRY STEWART REID, Esquire,
Director of Public Instruction in the North-Western Provinces,

being the first Chancellor, Vice-Chancellor, and Fellows of the said University, and all the persons who may hereafter become or be appointed to be Chancellor, Vice-Chancellor, or Fellows as hereinafter mentioned, so long as they shall continue to be such Chancellor, Vice-Chancellor or Fellows, are hereby constituted and declared to be one Body Politic and Corporate by the name of the University of Calcutta; and such Body Politic shall by such name have perpetual succession, and shall have a common seal, and by such name shall sue and be sued, implead and be impleaded, and answer and be answered unto, in every Court of Justice within the territories in the possession and under the Government of the East India Company.

Power to hold and dispose of property.

II. The said Body Corporate shall be able and capable in law to take, purchase, and hold any property, moveable

or immoveable, which may become vested in it for the purposes of the said University by virtue of any purchase, grant, testamentary disposition, or otherwise; and shall be able and capable in law to grant, demise, alien, or otherwise dispose of, all or any of the property, moveable or immoveable, belonging to the said University; and also to do all other matters incidental or appertaining to a Body Corporate.

Constitution of Body Corporate.

III. The said Body Corporate shall consist of one Chancellor, one Vice-Chancellor, and such number of ex-officio and other Fellows as the Governor-General of India in Council hath already appointed, or shall from time to time, by any order published in the *Calcutta Gazette*, hereafter appoint; and the Chancellor, Vice-Chancellor, and Fellows for the time being shall constitute the Senate of the said University.

Senate.

Provided that if any person being Chancellor, Vice-Chancellor, or Fellows of the said University, shall leave India without the intention of returning thereto, his office shall thereupon become vacant.

Chancellor.

IV. The Governor-General of India for the time being shall be the Chancellor of the said University, and the first Chancellor shall be the Right Honorable Charles John Viscount Canning.

Vice-Chancellor.

V. The first Vice-Chancellor of the said University shall be Sir James William Colvile, Knight. The office of Vice-Chancellor shall be held for two years only; and the Vice-Chancellor hereinbefore nominated shall go out of office on the first

day of January, 1859. Whenever a vacancy shall occur in the office of Vice-Chancellor of the said University by death, resignation, departure from India, effluxion of time, or otherwise, the Governor-General of India in Council shall, by notification in the *Calcutta Gazette*, nominate a fit and proper person, being one of the Fellows of the said University, to be Vice-Chancellor in the room of the person occasioning such vacancy. Provided that on any vacancy in the said office which shall occur by effluxion of time, the Governor-General of India in Council shall have power to reappoint the Vice-Chancellor hereinbefore nominated or any future Vice-Chancellor to such office.

Fellows.

VI. the Lieutenant-Governors of Bengal and the North-Western Provinces, the Chief Justice of the Supreme Court of Judicature at Fort William in Bengal or of any Court of Judicature hereafter to be constituted to or in which the powers of the said Supreme Court may be transferred or vested, the Bishop of Calcutta and the Members of the Supreme Council of India, all for the time being, shall be ex-officio Fellows of the said University. The whole number of the Fellows of the said University, exclusive of the Chancellor and Vice-Chancellor for the time being, shall never be less than thirty; and whenever the number of the said Fellows, exclusive as aforesaid, shall by death, resignation, departure from India, or otherwise, be reduced below thirty, the Governor-General of India in Council shall forthwith, by notification in the *Calcutta Gazette*, nominate so many fit and proper persons to be Fellows of the said

University as, with the then Fellows of the said University, shall make the number of such Fellows, exclusive as aforesaid, thirty. But nothing herein contained shall prevent the Governor-General of India in Council from nominating more than thirty persons to be Fellows of the said University if he shall see fit.

The appointment of Fellow may be cancelled.

VII. The Governor-General of India in Council may cancel the appointment of any person already appointed, or hereafter to be appointed a Fellow of the University, and as soon as such order is notified in the *Gazette*, the person so appointed shall cease to be a Fellow.

Chancellor, Vice-Chancellor, and Fellows to superintend the affairs of the University.

VIII. The Chancellor, Vice-Chancellor, and Fellows for the time being shall have the entire management of and superintendence over the affairs, concerns, and property of the said University; and in all cases unprovided for by this Act, it shall be lawful for the Chancellor, Vice-Chancellor, and Fellows to act in such manner as shall appear to them best calculated to promote the purposes intended by the said University.

Bye-Laws.

The said Chancellor, Vice-Chancellor, and Fellows shall have full power from time to time to make and alter any bye-laws and regulations (so as the same be not repugnant to law or to the general objects and provisions of this Act) touching the examination for degrees and the granting of the same; and touching the examination for honors and the granting of marks of honor for a higher proficiency in the different branches of Literature, Science, and Art; and touching

the qualifications of the candidates for degrees and the previous course of instruction to be followed by them, and the preliminary examinations to be submitted to by them; and touching the mode and time of convening the meetings of the Chancellor, Vice-Chancellor, and Fellows; and, in general, touching all other matters whatever regarding the said University. And all such bye-laws and regulations, when reduced into writing, and after the common seal of the said University shall have been affixed thereto, shall be binding upon all persons, members of the said University, and all candidates for degrees to be conferred by the same, provided such bye-laws and regulations shall have been first submitted to and shall have received the approval of the Governor-General of India in Council.

Meetings of the Senate.

IX. All questions which shall come before the Chancellor, Vice-Chancellor, and Fellows, shall be decided at a meeting of the Senate by the majority of the members present; and the Chairman at any such meeting shall have a vote, and, in case of an equality of votes, a second or casting vote. No question shall be decided at any meeting, unless, the Chancellor, or Vice-Chancellor, and five Fellows, or, in the absence of the Chancellor and Vice-Chancellor, unless six Fellows at the least, shall be present at the time of the decision. At every meeting of the Senate, the Chancellor, or in his absence the Vice-Chancellor, shall preside as Chairman; and, in the absence of both, a Chairman shall be chosen by the Fellows present or the major part of them.

X. The said Chancellor, Vice-Chancellor, and Fellows for the time being shall have full power from time to time to appoint, and, as they shall see occasion, to remove all Examiners, Officers, and servants of the said University.

Appointment and removal of Examiners and Officers.

XI. The said Chancellor, Vice-Chancellor, and Fellows, shall have power, after examination, to confer the several degrees of Bachelor of Arts, Master of Arts, Bachelor of Laws, Licentiate of Medicine, Doctor of Medicine, and Master of Civil Engineering; they shall also have power, after examination, to confer upon the candidates for the said several degrees, marks of honor for a high degree of proficiency in the different branches of Literature, Science, and Art, according to rules to be determined by the bye-laws to be from time to time, made by them under the power in that behalf given to them by this Act.

Power to confer degrees.

XII. Except by special order of the Senate, no person shall be admitted as a candidate for the degree of Bachelor of Arts, Master of Arts, Bachelor of Laws, Licentiate of Medicine, Doctor of Medicine, or Master of Civil Engineering, unless he shall present to the said Chancellor, Vice-Chancellor and Fellows, a certificate from one of the Institutions authorized in that behalf by the Governor-General of India in Council, to the effect that he has completed the course of instruction prescribed by the Chancellor, Vice-Chancellor, and Fellows of the said University, in the

Qualification for admission of Candidates for degrees.

bye-laws to be made by them under the power in that behalf given by this Act.

Examination for degrees.

XIII. The said Chancellor, Vice-Chancellor, and Fellows shall cause an examination for degrees to be held at least once in every year; on every such examination the candidates shall be examined either by Examiners appointed for the purpose from among the Fellows by the said Chancellor, Vice-Chancellor and Fellows, or by other Examiners so to be appointed; and on every such examination, the candidates, whether candidates for an ordinary degree or for a degree with honors, shall be examined on as many subjects and in such manner as the said Chancellor, Vice-Chancellor, and Fellows shall appoint.

Grant of degrees.

XIV. At the conclusion of every examination of the candidates, the Examiners shall declare the name of every candidate whom they shall have deemed entitled to any of the said degrees, and his proficiency in relation to other candidates; and also the honors which he may have gained in respect of his proficiency in that department of knowledge in which he is about to graduate; and he shall receive from the said Chancellor a certificate, under the seal of the said University of Calcutta and signed by the said Chancellor or Vice-Chancellor, in which the particulars so stated shall be declared.

Fees.

XV. The said Chancellor, Vice-Chancellor, and Fellows shall have power to charge such reasonable fees for the degrees to be conferred by them, and upon admission into the said

University and for continuance therein, as they, with the approbation of the Governor-General of India in Council, shall from time to time see fit to impose. Such fees shall be carried to one General Fee Fund for the payment of expenses of the said University, under the directions and regulations of the Governor-General of India in Council, to whom the accounts of income and expenditure of the said University shall once in every year be submitted for such examination and audit as the said Governor-General of India in Council may direct.

Annual accounts.

III.

BYE LAWS.

THE SENATE.

The Senate* as constituted by Act No. II. of 1857, shall meet ordinarily once a year, on the second Saturday in December, and at other times when convened by the Vice-Chancellor.

The Vice-Chancellor shall convene a meeting of the Senate on the requisition of any six of the Members.

Nine Members of the Senate shall constitute a quorum, and all questions shall be decided by a majority of the votes of the Members present.

THE FACULTIES.

The Senate shall be divided into four Faculties, namely, Art, Law, Medicine, and Engineering. Every Member of the Senate shall be a Member of one Faculty at least, and any Member of the Senate may be a Member of more than one Faculty.

The Faculties shall be appointed by the Senate at its Annual Meeting.

* By the 8th Section of Act No. II. of 1857, the Senate has power to make and alter Bye-laws and Regulations, subject to the approval of the Governor-General of India in Council.

Each Faculty shall elect its own President. Every Meeting of a Faculty shall be convened by its President, or in his absence, by the Senior Fellow belonging to that Faculty.

If any Faculty omit to elect a President for one month after its appointment, or after a vacancy occurs, the Vice-Chancellor may appoint any Member of such Faculty to be its President.

Three Members of any Faculty shall constitute a quorum of that Faculty.

THE SYNDICATE.

The Executive Government of the University shall be vested in a Syndicate, consisting of the Vice-Chancellor and six of the Fellows who shall be elected for one year by the several Faculties, in the following proportions:—

Three by the Faculty of Arts.
One by the Faculty of Law.
One by the Faculty of Medicine.
One by the Faculty of Engineering.

The elections to take place within one month before the Annual Meeting of the Senate, and the names of the persons to be elected to be declared at such Meeting.

The Syndicate shall meet ordinarily once a month, and at other times when convened by the Vice-Chancellor.

All the elected Members of the Syndicate must be resident in or near Calcutta, and if any such Member

is absent from Calcutta for more than three months, his place shall become vacant.

On every vacancy in the Syndicate, caused by death, resignation, absence from Calcutta, or otherwise, the Faculty, by whom the Member causing the vacancy was elected, shall proceed to elect a new Member for the remainder of the current year.

If any Faculty omit to elect a Member of the Syndicate within one month after a vacancy occurs, the Vice-Chancellor may appoint one from among the Members of that Faculty.

Four Members of the Syndicate shall constitute a quorum, and all questions shall be decided by a Majority of the votes of the Members present.

The Vice-Chancellor, or, in his absence, the Senior* Fellow present shall preside at all Meetings of the Syndicate, and if the votes, including that of the President, are equally divided, the President shall have a casting vote.

It shall be the duty of the Syndicate to appoint, and if necessary, to remove the Examiners and all other Officers of the University, except the Registrar; to order Examinations in conformity with the Regulations; and to fix the times at which they shall be held; to grant Degrees, Honors, and Rewards; to keep the Accounts of the University; and to correspond on the

* The ex-officio Fellows of the University are always the Senior Fellows in order of official precedence. The seniority of the other Fellows mentioned in the Act of Incorporation is according to the order in which their names appear there. The seniority of all other Fellows is according to the date and order of their appointment.

business of the University with the Government and all other authorities and persons.

During the year, between the Annual Meetings of the Senate, the Syndicate may appoint any Member of the Senate to any one or more of the Faculties, and may transfer any Member from one Faculty to another.

The Syndicate shall from time to time frame such Bye-laws and Regulations as may be necessary, subject to the approval of the Senate. Each Faculty shall report on any subject that may be referred to it by the Syndicate.

Any Faculty, or any Member, or number of Members of the Senate, may make any recommendation to the Syndicate, and may propose any Bye-Law or Regulation for the consideration of the Syndicate.

The decision of the Syndicate on any such recommendation or proposition, or any matter whatever, may be brought before the Senate by any Member of the Senate at one of its Meetings, and the Senate may approve, revise, or modify any such decision, or may direct the Syndicate to review it.

No question shall be considered by the Senate that has not, in the first instance, been considered and decided on by the Syndicate.

THE REGISTRAR.

The Registrar shall be appointed by the Senate. He shall be appointed for two years only, but at the

end of that term he may be re-appointed. If a vacancy occurs in this office between two Annual Meetings of the Senate, a Special Meeting of the Senate shall be convened for the purpose of appointing a Registrar, and in the meanwhile the Syndicate may appoint a Registrar *pro-tempore*.

The Registrar shall be the custodian of the Records, Library, Common Seal, and such other property of the University as the Syndicate shall commit to his charge.

All Meetings of the Senate, the Syndicate, and the Faculties, shall be convened through the Registrar, who shall keep a record of the proceedings of such Meetings.

*LICENTIATE IN CIVIL ENGINEERING.

1. The Examination, for the Degree of Licentiate in Civil Engineering, shall take place once a year; shall commence in the third week of March; and shall be held only in Calcutta.

2. The Degree shall not be conferred on any Candidate within seven academical years from the time of his passing the Entrance Examination in the Faculty of Arts; and until he produce certificates of having been engaged, for at least five years, in the study and practice of Engineering, of which three years must be study in a School of Engineering, and two years practice. But Candidates may proceed to the Examination in all branches, except that noted in Para. 11th of these regulations, on producing the following Certificates.

†1st. Of having passed the First Examination in the Faculty of Arts.

2nd. Of having completed a course of professional study, extending over three years, at any College of Civil Engineering, recognized by the Senate.

3rd. Of moral character.

* A Legislative Enactment is required to enable the Senate to confer this Degree. If it be received in time, the first Examination, under these Regulations, will be held in March, 1861.

† Special provision is made for those students who in the Session 1859-60 were, or at any previous time had been, members of the Civil Engineering College, Calcutta. All such shall be admitted to the Examination for the Degree of L. C. E. on the production of a Certificate, that they have attended during a period of three years at the Civil Engineering College. The result of such Examination shall be recorded, but the Degree of L. C. E. shall itself not be conferred until the Candidate shall have obtained the other Certificates required for this Degree.

3. Every Candidate must apply to the Registrar, in the form M,* at least fourteen days before the Examination begins, and with his application must produce the Certificates aforesaid.

4. A fee of twenty-five Rupees shall be paid by each Candidate, and no Candidate shall be admitted to the Examination, unless he have previously paid this fee to the Registrar. If a Candidate fail to pass the Examination, the fee shall not be returned to him. He may be admitted to any one or more subsequent Examinations on payment of a like fee, of twenty-five Rupees, on each occasion.

* FORM (M.)

To the Registrar of the University of Calcutta.

SIR,

I request permission to present myself at the ensuing Examination for the Degree of Licentiate in Civil Engineering.

I am, &c., &c.

PARTICULARS TO BE FILLED IN BY THE CANDIDATE.

Age, ...

Certificate, to be signed by a Professional Engineer. This may be sent to the Registrar any time before the Degree is conferred.

I certify that ——— has been engaged in the practice of Engineering during a period of at least two years, viz. from 18 —— to 18

(Signed)

5. The Examination shall be written, oral and practical.

6. Candidates shall be examined in the following subjects :—

I. Mathematics.
II. Mechanical Philosophy.
III. Natural and Experimental Science.
IV. Construction.
V. Drawing.
VI. Geodesy.

I.—MATHEMATICS.

Arithmetic.

Algebra.

Simple and Quadratic Equations, Ratio, Proportion and Variation, Arithmetical and Geometrical Progression.

Binomial Theorem.

Logarithms.

Geometry.

Euclid—Books—1, 2, 3, 4, 6 and 11 to Prop. 21, with deductions.

Conic Sections, treated Geometrically or Analytically.

Trigonometry.

As far as the solution of all cases of plane triangles.

Mensuration.

Mensuration of Surfaces and Solids.

II.—MECHANICAL PHILOSOPHY.

Statics.

Composition and Resolution of Forces, Centre of Gravity.

Mechanical Powers.

Virtual Velocities.

Friction.

Dynamics.

General Laws of motion.

Motion of Falling Bodies in free space and down inclined planes.

Vibration of simple pendulums.
Collision of Bodies.
Central Forces.
Moments of Inertia.
Centre of Oscillation.

Hydrostatics.

Equilibrium of Fluids.
Specific Gravity.
Equilibrium of floating bodies.
Centre of pressure.
Elastic fluids.

Principles of the Barometer and Thermometer and application to determine heights of Mountains; of the Airpump, Condenser, Pump, Syphon, and Hydrostatic Press.

Hydrodynamics.

Motion of fluids through a small orifice.
Percussion and Resistance of fluids.

Optics.

Laws of reflection, refraction, and radiation from Plane and Spherical surfaces. Formation of Images; simple and compound Lenses; the Eye; Principles of the Sextant, Telescope, and Microscope.

III.—Natural and Experimental Science.

Chemistry.

The elements of inorganic Chemistry, as laid down in Chambers's Course, and as applied to the preparation of wrought-iron, steel and cements.

Heat.

Elementary laws of Heat, with reference to steam and combustion of fuel.

Mineralogy.

Physical Characteristics of Minerals.

Physical Geography.

With special reference to that of India.

IV.—Construction.

Materials.

Stones. Preparation of Bricks and Tiles. Mortars and Cements. Paints. Iron and Steel. Preservation of Timber.

Practice of Building.

Earthwork.

Construction of Roads.

Construction of Railroads.

Selection of Line. Cuttings and Embankments. Tunnels. Gradients. Curves.

The practice of Bridge Building.

Carpentry.

Scarfs. Joints. Centres for Bridges. Roofs.

Hydraulic Works.

Flow of water in pipes and open channels, and over Weirs. Tanks. Canals. Sluices. Locks.

Strength of Materials.

Resistance of Iron and Wood to compression, tension, transverse and longitudinal strains and detrusion. Deflection of Beams. Various forms of Beams, Solid, and Hollow.

Stability of Structures.

As applied to retaining walls, bridges, abutments, walls of buildings, and framed structures.

Mechanism.

Motion—Machines, advantages and uses of.

Elementary forms. Levers. Cranks. Rolling contacts. Sliding contacts. Mechanism for modifying motion. Accumulation and Regulation of motion.

Sources of power—Gravity. Wind. Heat. Muscular action.

The Steam Engine, in detail.

Hydraulic Machines—Overshot, undershot and vertical wheels. Turbines. Reaction wheels.

Designs.

An original design for a work or works on given data, with report, specification, and estimate.

V.—Drawing.

Geometrical, Mechanical, Engineering and Architectural, Perspective, Isometrical Perspective, Free-hand and Landscape Drawing.

(Attested specimens of each kind, to be submited to the Examiners, in addition to the specimens to be executed during the Examination; to which marks will be assigned.)

VI.—Geodesy.

Use of the Scales. Prismatic Compass. Level. Theodolite, and Plane Table.

Topographical Surveying of limited areas.

Practice of levelling.

Route Surveying and laying out Curves.

Topographical drawing.

7. There shall be 12 papers of questions, namely—

One Paper on Arithmetic and Algebra.

One Paper on Geometry and Conic Sections.

One Paper on Practical Trigonometry, Logarithms and Mensuration.

One Paper on Statics and Dynamics.

One Paper on Hydrostatics and Optics.

One Paper on Chemistry and Heat.

One Paper on Mineralogy and Physical Geography.

One Paper on Materials and Practice of Building.

One Paper on Laying out Earthworks and Construction of Roads and Railroads.

One Paper on Carpentry and Mechanism.

One Paper on Hydraulic Works.

One Paper on Strength of Materials and Stability of Structures.

One day Drawing and Estimating.

One day vivâ voce Examination.

8. The subjects shall have the following maximum marks assigned to them.

Mathematics,	700
Mechanical Philosophy,	500
Natural and Experimental Science,	400
Construction,	1200
Drawing,	600
Geodesy,	600
	4000

To pass successfully, Candidates must obtain at least 1500 marks in all, and not less than one-fourth of the full marks allotted to each subject.

9. The names of the successful Candidates shall be arranged in two classes according to merit. A certificate, signed by the Registrar, of having passed the Examination, shall be given to each successful Candidate.

10. The first student of the first class shall receive a Gold Medal to the value of one hundred Rupees.

11. In addition to the above Examination, the Candidate must, at some period after he has been engaged not less than five years in the study and practice of Engineering, of which at least three years must be study, satisfy the Examiners of the University for the time being that he has acquired a thorough and practical knowledge of some branch or branches of Engineering in which he has been employed.

*MASTER OF CIVIL ENGINEERING.

1. The Examination for the Degree of Master of Civil Engineering shall take place once a year, shall

* Amended Regulations to take effect from January, 1862.

commence in the third* week of March, and shall be held only in Calcutta.

2. No Candidate shall be admitted to the Examination for the degree of M. C. E. unless he produce the following Certificates.

(1.) Of having attained the age of twenty-four years.

(2.) Of having graduated in Arts.

(3.) Of having obtained the Degree of Licentiate in Civil Engineering.

(4.) Of good moral character.

3. Every Candidate must send in his application to the Registrar with Certificate, in the form L,† at least fourteen days before the Examination begins.

4. A fee of twenty-five Rupees shall be paid by each Candidate, and no Candidate shall be admitted

* The time to be fixed by the Syndicate.

Presidency College.

The Presidency College was established on the 15th June, 1855, under orders from the Hon'ble the Court of Directors, in their Despatch No. 62, dated 13th September, 1854. The scheme was originally prepared by the Council of Education in the early part of 1854, at the request of the Marquis of Dalhousie, then Governor-General of India.

To carry out this scheme, an allowance of Rs. 7,640 per mensem was sanctioned for the Instructive Establishment.

There are sixteen Senior Scholarships attached to this College, each of the monthly value of 25 Rs. which are tenable for two years.

Two Junior Scholarships of 10 Rs. each per mensem, are annually available in each Mofussil Collegiate School for students, whose names are placed in the First Division at the University Entrance Examination. These Scholarships are tenable only

in this College. One Junior Scholarship of the same value is likewise attached to each zillah School, and is similarly tenable in this College for a period of two years.

Students are admissible on producing a Certificate of having passed the University Entrance Examination, or on passing an Examination at the College, of the same nature as that for University Entrance Candidates.

The College is open to all Classes of the community. All students are required to pay a fee of 10 Rs. on admission, and a monthly tuition fee of 10 Rs. afterwards.

The present instructive Staff is as follows:

Mr. Sutcliffe, M A.—Principal and Professor of Mathematics.

Major D. L. Richardson, Professor of English Language and Literature.

Baboo Ram Chunder Mitter, Professor of Vernacular Literature.

Mr. E. B. Cowell, M. A., Professor of History and Political Economy.

Mr. R Jones, Professor of Mental and Moral Philosophy and Logic.

Dr. H. Halleur, Professor of Natural Philosophy and Astronomy.

Vacant.—Professor of Natural History and Geology.

Mr. W. A. Montriou, Professor of Law and Jurisprudence.

Mr. C. Boulnois, M. A, Assistant Professor of Law.

Mr J. S. Rees, Assistant Professor of Mathematics.

Mr. R. Hand, Assistant Professor of English Literature.

Mr. J. Sanders, Assistant Professor of History.

Mr. J. Rowe, Drawing Master.

Medical College of Bengal.

1. The Medical College of Bengal was founded by Lord William Bentinck, in the year 1835.

The Government of the College and Hospital is vested in the Principal, aided by a Consultative Council, composed of all the Professors, subject to the general control of the Director of Public Instruction.

The Principal convenes a meeting of the Council whenever he thinks it expedient to do so, or whenever a requisition, signed by three Professors, and setting forth the question to be discussed, is made to him for this purpose.

At Meetings of the Council, the Principal, or in his absence the Senior Professor present, takes the chair. The chairman has a vote in all questions put to the meeting, and in the event of opinions being equally divided, has a second or casting vote.

Minutes of the proceedings of all such meetings are forwarded to the office of the Director of Public Instruction for record, or for such orders as may be necessary.

Any proposal involving a change in the prescribed course of instruction, or in the general management of the College or Hospital, which the Principal may desire to submit for the sanction of Superior Authority, must be laid before a meeting of the Council for discussion, before being so submitted; and the Principal, when forwarding his own proposal, forwards also any Resolution which may be come to, on the subject by the meeting.

All notices, orders, &c. relating to the internal management or economy of the College or hospital are signed and issued by the Principal.

THE PRIMARY OR ENGLISH CLASS.

This Class consists of Scholarship-holders, Free Students, and Paying Students. The number of Free Students in the College at one time is limited to 50, and nomination to the free list has been

left, by the Director of Public Instruction, in the hands of the Principal.

Free presentations are made entirely with reference to the ability of applicants, as shown by the position they may have held at the Entrance Examination in Arts of the University, or by possession of Scholarships from other Colleges.

Paying Students are required to pay an admission fee of Co.'s Rs 15, and 5 Rs per mensem during their stay in the College.

They are required to follow the curriculum of the College as laid down for the Primary or English Class, and are subject to the same rules regarding discipline.

All applicants for admission to this class, whether on the Scholarship, the free, or the paying list, are required either to have passed the Entrance Examination in Arts of the Calcutta University, or to promise to go up for that Examination when next held, and to satisfy the Principal that their acquirements are such as to have a fair chance of their passing it.

The expenditure on Scholarships of the Primary Class is limited to Rupees (400) four hundred a month, and this sum is ordinarily distributed among the students of the five years as follows :

To *Students of the 4th and 5th years, 14 Senior Scholarships at 12 Rupees a month, ...	168	0	0
To Students of the 1st, 2nd, and 3rd years			
Junior Scholarships at 8 Rupees a month, and augmentation stipends at 2 Rupees a month, in such number as not to exceed on the whole, ...	232	0	0
Total per mensem, ...	400	0	0

The augmentation stipends here referred to, are allowances given to lads who bring Scholarships with them from other

* For Students of these two years, University Scholarships are also available, and, for those of the 5th year, the Goodeve Scholarship likewise.

Institutions; and in such cases both Scholarship and augmentation allowance are to be drawn.

The Senior Scholarships are awarded according to the results of the "First Examination" for the Degree of Licentiate. But they are not awarded to Students who gain University Scholarships at such Examination. They are tenable for two years, on condition that the conduct and progress of the holder are satisfactory.

The Junior Scholarships are awarded either upon the published results of the University Entrance Examination, or on a Special Examination to be held for the purpose, according as may be found from time to time most convenient. They are tenable for three years on the like condition as above.

In the event of a Scholarship being forfeited, the amount already drawn is not liable to be refunded by the holder.

Any Scholarship falling vacant by the death, resignation, &c. of the holder may be awarded to Students of the same term, next in order of merit, who may be without a Scholarship, and may be possessed of the requisite qualifications.

The Goodeve Scholarship (value Rs. 12 a month) may be held in conjunction with any Scholarship awarded under these Rules.

Students of this class are required to follow the subjoined curriculum, which is framed for obtaining the Calcutta University Degree of Licentiate in Medicine and Surgery.

3. If duly qualified, the Student receives a certificate, signed by the Principal, the Professors of Medicine, Surgery, Materia Medica, and Anatomy, and by the native teachers of these subjects, declaring that he is sufficiently versed in Anatomy, Materia Medica, Practice of Medicine and Surgery, to qualify him for the office of native Doctor.

4. The Students of this class are all natives, chiefly Mussulmans, and are duly enlisted as Soldiers from the date of their joining the College. They are destined for employment chiefly in Military, but also in civil hospitals and dispensaries.

THE BENGALI CLASS.

The instruction of this class is conducted in the Bengali language.

The course of Study is not prescribed by the University, but is in accordance with the orders of Government.

The course of Study of this class is precisely similar to that of the Hindustani class, the only difference being that the Bengali language is employed instead of the Oordoo as a medium of communication.

The Students remain the same time in the college, undergo similar Examinations, and obtain the same description of certificate of qualification.

The Students of this class are destined for employment as native doctors, in the civil hospitals of Bengal, whilst many engage in private practice instead of entering Government service.

College of Civil Engineering, Calcutta.

This College was established by Government, in 1856, for the purpose of supplying properly qualified candidates for all grades of the Public Works and Survey Departments; and for employment under the different companies now, and hereafter, to be engaged upon Indian Railways.

The course of instruction extends over three years, and is adapted to meet the wants of each grade of the Profession: it is limited by the requirements necessary for the Degrees granted by the University in the Faculty of Engineering.

Candidates for admission to this College must have passed the Entrance Examination of the University, or be holders of senior scholarships. Applications for admission must be made on or before the 20th of May, in the printed form, prescribed for the purpose, which may be had on application at the College.

The annual session commences on 1st June of each year, and closes on the 15th April.

The Government of India is prepared to give, and for the present guarantees, employment, within the following limits yearly, to such students as pass the test for the Public Works Department, laid down in Chapter II. of the Public Works Code, viz.

5 appointments in the Engineer branch.	2 to Europeans. 3 to Natives.	Salary beginning with from 100 to Rs. 200 per mensem.
13 ditto ditto in the upper subordinate branch.	5 to Europeans. 8 to Natives.	Salary beginning with 60 Rs. per mensem.
30 ditto ditto in the lower subordinate branch.	30 to Natives.	Salary beginning with 25 Rs. or 40 Rs. per mensem according to qualification.

These appointments will be given, as prizes, to the most distinguished students when the number of those that qualify exceeds the limits specified; all are appointed on probation for the first year.

Scholarships.

Holders of Government Scholarships are permitted to retain them in this College, for the same time as they would have been entitled to keep them had they remained at their original Schools or Colleges, subject to the same conditions as regards progress in their studies. They are exempt from fees, so long as they retain their Scholarships.

Senior Scholarships, tenable for one year, (in the proportion of 10 per cent. of the competitors) will be awarded each year to qualified students who have been two years in College. These, and such Scholarships as may be established from private funds, placed at the disposal of Government for the purpose, will be competed for at the periodical examinations; it being understood that no student, can, at the same time, hold more than one senior Scholarship.

At present there are two "Forbes" Scholarships (instituted to perpetuate the memory of Major General Forbes of the Bengal Engineers, late Master of the Calcutta Mint) each of Rupees 10 per mensem in value, tenable for one year, subject to progress.

All prizes are awarded on the same conditions that obtain in the other Government Colleges, viz.:—no student over 21 years of age can receive a Scholarship, nor, if over 23 years, a prize.

Fees.

On joining the College an entrance fee of Rs. 10 will be paid by each student and a monthly Fee during the first year of Rs. 3, during the second of Rs. 4, and during the third and following years of Rs. 5. But, in order to encourage Candidates who, in the outset, aspire to the higher classes of certificates, to qualify themselves in the general branches of education, as far as possible, before joining this College, the nature of which is purely special, a monthly fee, as above, during the first and second years, but of Rs. 4 only during the third year, will be

demanded from those who are qualified up to the first year's course of Government Colleges, and of Rs. 3, throughout the first three years of their attendance, from those qualified up to the second year's course of the same or senior scholarship standard.

A Candidate having already paid an entrance fee in any Government College will only have to pay the difference (if any) between that fee and Rs. 10 the Entrance Fee to the C. E. College.

Outstudents. A limited number of outstudents will be permitted to attend the College on payment in advance of a fee of Rs. 15 each session, for each branch of study they desire instruction in. They are not required to undergo any Entrance Examination, but must produce satisfactory testimony of good character, and must, in every way, conform to the Regulations of the College. They are not permitted to compete with the regular students at the Public Examinations for Prizes or Scholarships. In the prosecution of their studies, they have the same advantages as the regular students. An outstudent joining after the commencement of a session, must pay the full fees for that session.

Military Students. Five officers of the Army, under the rank of Field-officers, will be admitted annually to study at the College under certain special conditions.

Discipline, &c. The executive control of the College is vested in the Principal. He is responsible for the progress of the students in their studies and for their general good conduct. Discipline is maintained by means of fines and temporary or permanent removal, according to the gravity of the offence.

All students must provide themselves with the text books in use, also with drawing or Mathematical Instruments and Marquois' Scales.

Library and Museum. The Library is open to all students, subject to certain regulations.

A Museum and Model Room is being gradually established.

Hooghly College.

This Institution was founded in 1836, and is mainly supported from funds bequeathed by Mahomed Moshim, a wealthy Mahomedan gentleman who dying without heirs, in the year 1806, left his large property, yielding an annual income of 45,000 Rupees, to Mahomedan Trustees "for the service of God." Owing to the misappropriation of the Funds, Government assumed the office of Trusteeship. This right of assumption was opposed by the original Trustees, but upheld both by the Courts in India and by the Privy Council in England. The period of litigation extended over many years, during which the annual income accumulated,

forming a surplus fund of 861,100 Rupees. This fund was devoted to founding and endowing the Hoogly College. It was further increased by a portion of the original Zemindary and by the lapse of various pensions with which the estate had been burdened.

It consists of two departments, an English and an Arabic, and is under the control of the Director of Public Instruction, Lower Bengal.

Dacca College.

This institution is supported by Government, and is under the control of the Director of Public Instruction, Lower Bengal.

It was originally opened as a School by the General Committee of Public Instruction in the year 1835. In 1841, it was converted into a College, when a Principal was appointed, and an increase made to the staff of teachers. The College building was erected partly by public subscription in the same year at a cost of Co.'s Rs. 36,679.

The College and its School are for the benefit of all classes of the people, and comprise Christian, Hindoo and Mahomedan students. The fee for tuition, in the College and the three highest classes of the school, is 2 Rs. 8 ans. a month for each student, and in the lower classes of the school 1 Rupee 8 annas a month.

The students of any school are admitted to the College on paying the usual fees, if they have previously passed the University Entrance Examination.

Scholarships.

There are eight Senior Scholarships attached to the College, each of the value of twenty Rupees. Four of these are available every year to be competed for by students at the end of the second year from their entrance into the College. These scholarships are each tenable for two years.

There are also twenty-four Junior Scholarships, each of the value of eight rupees, disposed of as follows. Twelve to the Collegiate School, twelve to private Schools.

As all scholarships are tenable for two years, half the number may be awarded each year to candidates who have passed successfully the University Entrance Examination.

Junior scholarships of the value of eight Rupees a month, tenable at this College, are also attached to the following Government schools.

Bograh,
Mymensing,
Chittagong,

Nowkhally,
Commillah,
Burrisaul,
Furreedpoor.

A silver Medal, called the Donnally prize, is awarded annually of the value of the interest of Co.'s Rs. 1,000, subscribed by the native assistants of the late Abkarree Commissioner's office in memory of the late Mr. A. F. Donnally.

In addition to the prizes awarded by Government, prizes are awarded every year to pupils of the school, called the Ram Lochun prizes, of the value of the interest on Co.'s Rs. 1,000, which sum was presented by Baboo Ramlochun Ghose, Principal Sudder Ameen, Dacca.

Local Committee.

The Local Committee is composed of eight ex-officio members, the Commissioner, the Judge, the Collector, the Magistrate, the Civil Surgeon, the Inspector of Schools, the Principal Sudder Ameen, and the Principal of the College, who is also the Secretary, and also of a few other respectable inhabitants of the station.

Staff of the College and Collegiate School.

W. Brennand,—Principal and Professor of Mathematics and Natural Philosophy,

F. Tydd,—Head Master and Professor of English Literature.

Vacant,—Second Master and Assistant Professor.

Sree Nauth Turkopunchanun,—Senior Pundit.

Eleven Masters employed exclusively in the Collegiate School.

Kishnaghur College.

This College was founded by Government, in 1845, and is under the control of the Director of Public Instruction, Lower Bengal.

It was designed to provide education for 500 pupils, and an establishment, commensurate with this object, was from the first sanctioned, to be gradually entertained as the future growth of the College might require.

Scholarships.

Senior and junior Scholarships, of the monthly value of Rs. 30 and Rs. 8 respectively, are attached to it. The Senior Scholarships were at first Rs. 30 for 2 years, and Rs. 40 for the succeeding 4 years. These were tenable, the former for 6 the latter for 4 years, but the Senior scholarship has been since reduced to Rs. 20, and the Junior and Senior Scholarships are now alike tenable for 2 years only.

The College building is a noble edifice, standing upon 3 beegahs of land, and surrounded by an enclosed compound of upwards of 100 more. It was erected, at a cost of Rs. 66,876; Rs. 17,000 of which was collected by private subscription. In consideration of the liberality thus manifested in the district, a donor of Rs. 1,000 is allowed to place a boy, free of expense, at the College in perpetuity, and another for every Rs. 500 additional he may have subscribed. Part of the ground occupied was purchased by Government, for the remainder the College is indebted to the munificence of the Maharajah of Nuddea and the Ranee Surnomoye of Cossimbazar.

Berhampore College.

(Established 1853).

This College is supported by Government and is under the control of the Director of Public Instruction, Lower Provinces. It was esta-

blished, in consequence of the desire shewn for such an Institution at a meeting held in Berhampore on the 10th of August, 1853; when upwards of twenty thousand Rupees was subscribed towards erecting a building; this sum was afterwards increased, by additional subscriptions, to twenty-nine thousand, and in consequence of accumulated interest, the amount now available towards the erection amounts to thirty-five thousand rupees, which the Government has promised to increase to sixty thousand. Owing to various circumstances, amongst which not the least important is the difficulty of finding a suitable site near the native town, without encroaching upon the European Cantonments, the building has not as yet been commenced, and instruction is at present given in a bungalow erected for the purpose.

The instructive staff of the College consists of a Principal, twelve masters, and two Pundits.

There are eight senior scholarships, in value 20 Rupees a month, attached to the College, to be competed for by such students as have passed the Entrance Examination of the University two years before.

There are twelve Junior Scholarships of eight Rupees a month, awarded to such students as have studied for at least one year in the Collegiate school, and who pass the Entrance Examination in the first grade.

In addition to these there are Junior Scholarships attached to various affiliated Zillah schools, which are tenable at the College.

Annual prizes to the amount of Rs. 150 per annum are granted by Government for general proficiency in the different classes.

There is a Library attached to the College, for which a grant of Rs. 100 per mensem is allowed.

Agra College.

Agra College is mainly supported by Government and is under the control of the Director of Public Instruction, North-West Provinces. It was established by the direction of the General Committee of Public Instruction in 1823-4 and placed under the superintendence of a local Committee, consisting of the Government Officials of the place, with a paid Secretary, who also acted as superintendent of the Institution. It was opened to all classes of the population, and "was designed to diffuse more widely than Native Schools, the possession of useful knowledge, to give a command of the language of ordinary life, and of official business—and therefore to teach principally Hindee and Persian, with the native mode of keeping accounts (Leelavattee) and to give instruction in Sanskrit and Arabic. It was not designed to impart an elementary Education: the pupils were expected to have made considerable progress previous to their admission."

Separate teachers of Sanskrit, Hindee, Persian and Arabic were appointed. Of the 115 candidates, which were admitted, 71 joined the Persian classes; 46 the Hindee; 16 read Sanskrit and 15 Arabic; all were taught gratuitously, and more than ⅔ of the whole received stipendiary allowances.

Subsequently in successive years, the introduction of new subjects, and the addition of new teachers gradually changed the character of the Institution, from that of a purely Oriental School to that of an Anglo-Vernacular College, having a Principal, and upper and lower departments of study, and containing as now (1860) no pupil who does not study English with Urdu or Hindee.

Endowments, &c.

This College was originally endowed by "a fund in the districts of Agra and Allygurh, amounting to about a lakh and a half of rupees, from villages formerly held by Gungadhur Pundit, the interest of which and the annual collections from the villages exceeded 20,000 Rupees per annum. To this has been added, from time to time, Government monthly allowances for Teachers, Scholarships, &c. in all amounting annually to about 35,000 Rupees.

Its other endowments are: (1st.) Two Scholarships founded by their Highnesses the Rajahs of Gwalior and Bhurtpore of 16 Rupees each monthly: (2d.) A Law Prize-Scholarship of 10 Rupees monthly, for which the competition is open to two other Institutions in Agra: (3d.) The Robertson and Maunsel medals, the former of the value of 100, and the latter of 70 Rupees: (4th.) An annual Gold Medal, endowed with the interest of 2,500 Rupees by the Committee of the Thomason Testimonial Fund.

Before the mutiny of 1857, it possessed a large and valuable Library, consisting partly of purchases and partly of donations. Among the latter were the Oriental books of Major Thoresby, formerly Political Agent in Rajputana, and the Library of the late Hon'ble James Thomason, formerly Lieutenant-Governor of the N. W. Provinces. Its scientific apparatus also was very ample and well adapted for the purposes of experimental Physics; whilst its small museum of Economic Geology and of some rare coins and antiquities gave promise of rising into considerable interest and utility; but the whole of these collections, together with the College records, were destroyed in the mutiny of 1857, and the buildings themselves left almost a ruin.

Fees.

The practice of exacting fees, though introduced in 1835, did not come into complete operation till 1848; but the present scale of payment was regulated by the Local Committee in 1846. It depends upon the income of the parents. Those whose income is 100 Rupees monthly, pay 5; those who have 70, pay 3; and those who have only 30, pay 1 Rupee: all incomes under 30 are charged 8 annas per month. Free students are occasionally admitted.

CONDITIONS OF ENTRANCE, ATTENDANCE, &c.

Besides an entrance fee of 2 rupees (from which none are exempted) and submission to the rules of the Institution, no other conditions are required, except a competent knowledge of the elements of English and Urdu or Hindee.

The time requisite for completing a full course of Instruction in the College department is five years and for that in the School department seven.

The average number of pupils attending for the last 3 years was 231 : the number at present is 375.

Benares College.

AFFILIATED 1860.

The Benares Sanscrit College was founded by Government in 1791 for the cultivation of the languages, literature, and (as inseparably connected with these) the religion of the Hindus. In 1830 an English Institution was established, distinct from the Sanscrit College at first, but incorporated with it in 1853.

Doveton College.

AFFILIATED 1857.

This College is the higher department of the Parental Academic Institution, a boarding and day school, established on the 1st March, 1823, by a body of parents, anxious to secure for their children the benefits of a thorough education. The pupils are instructed in the doctrines of Christianity as held by the Protestant Churches, but no one is necessarily excluded on account of creed. The Educational department till 1855 was conducted by a

Rector, aided by a staff of masters. In that year a legacy of two lacs and 30,000 Rupees, bequeathed by the late Captain John Doveton, together with the increasing resources of the Institution, enabled the managers to extend it by the establishment of a College Department, named in honor of the donor of the legacy. The classes are conducted by a Principal and two Professors.

In 1858 a sum of 50,000 Rupees of legacy, together with 80,000 Rupees of the ordinary school income was expended in purchasing, for the use of the Institution, the Buildings and Grounds of 41 and 42, Park Street.

Two scholarships, each of the value of 25 Rs. per month, and tenable for 4 years are awarded to the two students who pass highest in the University Entrance Examination. They are given on the condition that the holder goes up for the Bachelor of Arts degree. They carry with them the privilege of free Education. A gold Medal of the value of 120 Rs. is annually given to the best scholar in the highest class; a medal is also given for the best English Essay on a subject not made known till the time of competition.

Attached to the Institution is a valuable Library containing upwards of 4,000 volumes in the various departments of Literature and Science. It is supported by subscriptions, donations and a monthly grant of Rs. 50 from the funds of the Institution.

The business arrangements are conducted by a Committee, annually chosen from a society of members consisting of 2 classes, 1st, Parents and Guardians, 2nd, Those who subscribe 2 Rs. a month or 300 Rs. at once. The children of the latter have the privilege of being educated free, if their parents die without property sufficient to defray the expense. A general meeting of the Society is held annually on the 1st March.

St. Paul's School.

AFFILIATED 1857.

This Institution was founded in 1845 and is under the control of a Committee, of which the Bishop of Calcutta is President, and the Venerable the Archdeacon, Vice-President.

FOUNDATION, SCHOLARSHIPS AND PRIZES.

1. *Foundation.*—One Boarder and Four Day-Boys are on the Foundation; the first receives his board and education free, and the other four their education. The nomination to these is with the Bishop of Calcutta.

2. *Bishop Wilson's Scholarship.*—Two scholarships of 20 Rupees a month have been endowed in memory of the late Bishop Wilson, each to be held for two years. According to the terms of the endowment, these scholarships are competed for by the whole of the Christian Boys in the school, whether Boarders or Day-Boys; one being given every year. They were instituted in the hope that the higher boys may be induced to extend the period of their studies, and become fitted to graduate in the University.

3. *Prizes.*—Two silver Medals, one for proficiency, the other for general good conduct, are awarded at the annual Christmas Examination. Prizes in Books are also given to the most proficient in each class.

COURSE OF STUDY.

The subjects of examination for Entrance into the University of Calcutta, form the basis of instruction in the first class.

The study of the remaining five classes is arranged in a gradual proportion down to the first elements of learning. The whole course assigned for each class is so adjusted as to occupy one year.

In addition to the above school course, there is in operation a course of training for the B. A. Degree in the University of Calcutta. This is done in conformity with the conditions of affiliation to the University. Here again the subjects appointed to be read, are divided in such a way as to embrace a distinct course for each year.

Free Church Institution.

AFFILIATED 1857.

Originally established by Dr. Duff in August 1830 for the education of native youth under the name of the General Assembly's Institution, and since 1843 designated the Free Church Institution, being supported by the Free Church of Scotland.

The Institution, since 1857, has been in a handsome new edifice, Nimtollah Street, which has been erected at a cost of upwards of £15,000.

It consists of two departments, a College department, and a Preparatory and Normal School.

In the Preparatory school are taught all the ordinary branches of elementary education, English and Bengali, including the facts and principles of the Christian faith.

The teachers and some of the senior students are constituted into a Normal class for special prelections and exercises. In the lower classes, for the last 20 years, there has been introduced a modification of Stow's training system, with gallery, &c.

In the College department all the branches of a higher education in English Literature, Science, and Philosophy, with Bengali and Sanskrit, are taught, in immediate connection with systematic instruction in the doctrines and evidences of Natural and Revealed religion.

For the last 20 years the average number of pupils has exceeded a thousand; of whom about a hundred belong to the College department.

Scholarships.

1. There is an endowment of Rs. 100 per month for small scholarships of 5 or 6 rupees per month each, which are allotted only to those who pass the University Entrance Examination.

2. There are two endowed Theological Scholarships of Rs. 16 per month each, called "the Duff Scholarships," designed for students who are candidates for the Christian ministry.

3. There is also an endowed "Hawkins' Scholarship," of Rs. 8 per month; founded by the liberality of the gentleman whose name it bears.

4. A few Government Scholarships, of Rs. 10 per month, have been granted to those who most successfully passed the University Entrance Examination.

Annual Prizes.

1. Endowed prizes:—The Hawkins' gold medal of Rs. 100 value to the most successful student in the Institution.

The Macdonald Memorial Prize.

The Ewart Memorial Prize of Rs. 50.

The Kelloe Prize of 40 or 50 Rupees, founded by the late Mr. Buchan of Kelloe.

These are usually allotted for the best Essays on prescribed subjects.

2. Besides these, prizes for general scholarship and regular attendance are awarded in all the classes; with several more for special exercises or essays.

MANAGERS AND TEACHERS.

Alexander Duff, D D., LL.D., superintendent; David Ewart, D.D.; Rev. W. C. Fyfe; Mr. A. Thompson, with upwards of 20 assistant Native Teachers and Pundits.

SCHOLARS.

A considerable number are Under-graduates of the Calcutta University; one has obtained the degree of B. A. Of those who have been trained in the Institution, several are now ordained ministers of the gospel; some have proved successful Teachers in Government and other Colleges and schools; some have excelled in the Medical and other departments; some occupy the office of Deputy Magistrates and other influential posts in the general service of Government, and many are honourably employed in connection with Mercantile, Railway, Surveying and other operations of public utility.

La Martiniere College.

AFFILIATED 1857.

This Institution was founded by Claude Martin, a native of Lyons in France, and a Major-General in the service of His Majesty, the King of Oude, who, by his will, bequeathed a sum of three hundred and fifty thousand Sicca Rupees, afterwards considerably augmented, to be devoted to the establishment of a school for the Christian inhabitants of Calcutta, under the direction of the Government of the Supreme Court.

To give effect to the provisions of General Martin's will in reference to this bequest, the Supreme Court issued a decree, dated October 22nd, 1832, whereby the present Institution was established and distinguished by the name of *La Martiniere*, as directed by the Founder.

Governors.

By this decree, a body of Governors was constituted, consisting of the Governor-General, the Members of Council, the Judges of the Supreme Court, the Bishop of Calcutta, and the Advocate-General for the time being, together with four additional Governors to be elected by them annually. The four Governors so elected, with one of the ex-officio Goverors, form a board of Acting Governors, to whom the general control of the Institution is entrusted.

Secretary.

Provision is made for the appointment of a paid Secretary.

Foundation Boys.

The decree directs "that the Governors shall, from time to time, select from among the Christian population of Calcutta, a sufficient number of poor boys, of an age not less than 4, nor more than 10 years, so that there may always be at the least 30 boys on the establishment of the said school, and that such boys shall be entirely educated and supported out of the funds of the said school." By a subsequent decree, the number of boys on the Foundation was increased to 75. The decree further directs that Boarders and Day-Scholars shall be admitted at the discretion of the Governors, provided that they are not a burden on the charity.

The Institution was opened on the 1st March, 1836. It is divided into two departments, College and School. The Educational Staff consists of a Principal, a Head Master, and four assistant Masters, together with Drawing and Music Masters and a Pundit.

Prizes and Scholarships.

A gold medal is annually awarded on the 13th of September, the anniversary of the death of the Founder, to the head boy of the College Department, and prizes of books are given in all the classes.

Three Scholarships are also then awarded, tenable for one year, one in the College Department of Rs. 25 a month, one in the 1st Class of the school, of Rs. 20, and one in the 2nd Class of Rs. 16.

AFFILIATED 1857.

This Institution was founded by the London Missionary Society in the year 1838. In 1854 the large and handsome building now used, consisting of a Library, a Hall, and fourteen Class rooms, was first opened.

It is supported by the funds of the London Missionary Society, by voluntary contributions, and by a fee of four annas levied on each scholar. The number of scholars usually in the Institution is about 400. A Branch School at Behala has an attendance of 170.

The object aimed at is to give a thoroughly good secular and Christian education in English. The course of study comprehends English, Indian and General History; Mental and Moral Philosophy; Mathematics; Physical Science; Christian Evidences, and English Literature. Besides the general department, there is, connected with the Institution, a Theological class for training Christian Natives for Missionary work.

Queen's College, Colombo, Ceylon.

AFFILIATED 1859.

This Institution was founded, under the name of the Colombo Academy, in the year 1836, during the Government of the Rt. Hon'ble Sir Robert Wilmot Horton, and is supported by the Government of Ceylon, who pay all the salaries and other necessary expenses, these are in part repaid by the fees received from the students, which vary from £1-15-0 annually, in the lowest classes, to £7-10-0 in the highest.

The only endowment connected with it is the "Turnour Prize," which was instituted in 1843, from a fund raised for the purpose of testifying respect for the memory of the late Hon'ble George Turnour, at the time the following resolution was passed by the subscribers.

"That the interest of the money raised (£190) be devoted to give one prize yearly in the Colombo Academy, to the most advanced and best conducted scholars; that the sum so awarded be called. 'The Turnour Prize,' and be placed under such regulations as the Central School Commission may establish."

The Colombo Academy was for many years the only Institution in the Island, with the exception of one supported by the American Board of Missions at Batticotta near Jaffna, which professed to give a liberal education to its alumni. Several of its former students have filled and are now filling high offices on the Bench of the Supreme Court, in the Executive and Legislative Councils of Ceylon, and in other important positions.

ENGLISH—POETRY.

1. Sketch the plot of Sir W. Scott's "Marmion." In what does its chief excellency consist?

2 And why stands Scotland idly now,
Dark Flodden! *on thy airy brow,*
Since England gains *the pass* the while,
And struggles through the deep *defile?*
What checks the fiery soul of James?
Why sits that champion of the dames
Inactive on his steed;
And sees, between him and his land,
Between him and Tweed's southern strand,
His host Lord Surrey lead?
What 'vails the vain knight-errant's *brand?*
O, Douglas, for thy leading wand!
Fierce Randolph, for thy speed!
O for one hour of Wallace *wight,*
Or well-skilled Bruce, to rule the fight,
And cry—"Saint Andrew and our right!"

Another sight had seen that morn,
From Fate's dark book a leaf been torn,
And Flodden had been Bannock-bourne!
The precious hour has passed in vain,
And England's host has gained the plain;
Wheeling their march, and circling still,
Around the base of Flodden-hill.

Explain the allusion in this passage; also, the words in italics.

3. Parse these lines:—

"Another sight had seen that morn,
From Fate's dark book a leaf been torn,
And Flodden had been Bannock-bourne!"

4. Distinguish between Epic and Lyric Poetry; and name the most distinguished ancient and modern Poems in each class.

5. Paraphrase the following passage:—

And all about old stockes and stubs of trees,
Whereon nor fruit nor leafe was ever seen,
Did hang upon the ragged rocky knees;
On which had many wretches hanged beene,
Whose carcasses were scattered on the greene,
And throwne about the cliffs. Arrived there,
That bare-head knight, for dread and dolefull teene,
Would faine have fled, ne durst approchen neare;
But th' other forst him staye, and comforted in feare.

That darksome cave they enter, where they find
That cursed man, low sitting on the ground,
Musing full sadly in his sullein mind;
His griesly lockes long growen and unbound,
Disordered hong about his shoulders round,

And hid his face, through which his hollow eyne
Lookt deadly dull, and stared as astound;
His raw-bone cheekes, through penurie and pine,
Were shronke into his iawes, as he did never dine.

6. From what source did Shakspeare draw his knowledge of Julius Cæsar? How does his view differ from the generally received account?

7. Contrast the characters of Brutus and Cassius, and quote the passages which determine you in your opinion of the character of each.

8. In what sense does Shakspeare use the following words:—"factious," "remorse," "addressed," "jealous."

9. What different readings have been proposed in the following passages? Which do you prefer, and why?

(*a.*) I must prevent thee, Cimber,
This couching, and these lowly courtesies,
Might fire the blood of ordinary men,
And turn preordinance and first decree
Into the law of Children.

(*b.*) I dreamt to night that I did feast with Cæsar,
And things unluckily charge my fantasy.

(*c.*) *Cassius.* I am a soldier, I,
Older in practice, abler than yourself
To make conditions.

Brutus. You say you are a better soldier.
Let it appear so; make your vaunting true,
And it shall please me well. For mine own part,
I shall be glad to learn of noble men.

(*d.*) All the conspirators, save only he,
Did that they did in envy of great Cæsar.
He, only, in a general honest thought
And common good to all, made one of them.

10. Explain the force of the following terminations:

ment;	ate;	and give examples.
ist;	ing;	
en;	ard;	
ly;	ish;	

11. How are diminutives formed?

ENGLISH—PROSE.

1. Relate very shortly the chief events in the life of Milton, and give a list of his principal works, chronologically arranged.

2. On what grounds has Milton's language been called a "Babylonish Dialect?" How far do his writings justify the assertion that "he saw Nature through the spectacles of books"?

3. What opinion, prevalent in the age of Milton, is referred to in the following lines:—

> "Unless an age too late or cold
> Climate, or years damp my intended wing"?

With reference to this passage, Johnson remarks:—

"He might still be a giant among the pigmies, the one-eyed monarch of the blind."

Explain this.

4. Explain the following passages fully:—

(*a*) "Which side he took I know not; his descendants inherited no veneration for the White Rose."

(*b*) "He studied in the academy of Paracelsus, and made the universe his favorite volume."

(*c*) "He that runs against Time, has an antagonist not subject to casualties."

(*d*) "He has few thanks to pay his stars that he was born among Englishmen."

(*e*) "He reclaimed his loan by an execution."

(*f*) "Translation, says Dryden, is not so loose as paraphrase, and not so close as metaphrase."

5. "His poetry is first to be considered, of which it must be confessed that he has not often those felicities of diction which give lustre to sentiments, or that vigour of sentiment that animates diction. There is little of ardour, vehemence, or transport; there is very rarely the awfulness of grandeur, and not very often the splendour of elegance. He thinks justly, but he thinks faintly. This is his general character, to which, doubtless, many single passages would furnish exceptions."

Give the substance of this criticism in your own words. To whom does it refer?

6. Relate the history of the production of the English Iliad. Explain the following passage, and state to what it refers:—

"I appeal to the people as my rightful judges, and, while they are not inclined to condemn me, shall not fear the high-flyers at Buttons."

7. Give briefly the substance of Johnson's comparison between Pope and Dryden.

8. According to Johnson, the qualities that constitute genius are *invention*, *imagination*, and *judgment*. Explain what he means by each of these terms.

9. Distinguish between a *simile* and a *metaphor*. State the requisites for a perfect poetical simile according to Johnson; and explain his remark that "a simile is said to be a short episode." Point out the faults of the following passage:—

"I bridle in my struggling muse with pain,
That longs to launch into a nobler strain."

10. In the following passages, explain the meanings of the words in italics, and give their derivations :—

(*a*) "In his academical studies he was either not diligent, or not *happy*."

(*b*) "A proposal for correcting, improving, and *ascertaining* the English Tongue."

(*c*) "His *literature* was unquestionably great."

Also, derive and explain the words, *pedantry*, *egregious*, *paradox*, *person*, *fraught*, *university*, *critic*, *comic*.

LATIN—POETRY.

1. Where, and under what consuls, and in what year of the world was Virgil born? Who and of what sect was his preceptor? Where and when did he die and where was he buried? Quote the epitaph which he is said to have written on himself.

2. Translate :—

Tuque adeô, quem mox quæ sint habitura Deorum
Concilia, incertum est: urbisne invisere, Cæsar,
Terarumque velis curam, et te maximus orbis
Auctorem frugum, tempestatumque potentem
Accipiat, cingens maternâ tempora myrto:
An deus immensi venias maris, ac tua nautæ
Numina sola colant: tibi serviat ultima Thule,
Teque sibi generum Tethys emat omnibus undis.

What is the subject of this Georgic (1) and mention the different times for *sowing* the different kinds of grain according to Virgil? Who is the Cæsar mentioned in this passage.

Where is Thule? parse "immensi" and "tibi."

3. Illa seges demum votis respondet avari
Agricolæ, bis quæ solem, bis frigora sensit.

Give an account of the Roman method of ploughing, explaining bis quæ solem, &c.

4. Translate :—

Multi ante occasum Maiæ cœpere : sed illos
Expectata seges vanis elusit aristis.
Si vero viciamque seres, vilemque faselum,
Nec Pelusiacæ curam aspernabere lentis ;
Haud obscura cadens mittet tibi signa Bootes :
Incipe, et ad medias sementem extende pruinas.

Who was Maia ? parse "cœpere" and "aspernabere." What other verbs are conjugated like cœpi ? Where is Pelusium ? In what month did Bootes set ?

5. What season of the year do the following lines respectively express ?

(*a*) Subipsum Arcturum. ..... .

(*b*) Primis extemplo a mensibus anni. . .. .

(*c*) Ante tibi Eoæ Atlantidis abscondantur.

(*d*) Candidus auratis aperit cum cornibus annum
Taurus et averso cedens canis occidit astro.

6. Translate :—

Scilicet et tempus veniet, cum finibus illis
Agricola, incurvo terram molitus aratro,
Exesa inveniet scabrâ rubigine pila :
Aut gravibus rastris galeas pulsabit innanes,
Grandiaque effossis mirabitur ossa sepulchris.

What is the etymology of *scilicet* and *agricola.*

Parse molitus, exesa, ossa, effossis. Why is the epithet *incurvo* applied to the plough ?

7. Numque aliæ nullis hominum cogentibus ipsæ
Sponte sua veniunt ....
Pars autem posito surgunt de semine.

Point out the distinction intended by the poet between "sponte sua" and "posito de semine."

8. An memorem portus, Lucrinoque addita claustra,
Atque indignatum magnis stridoribus æquor:
Julia qua ponto longe sonat unda refuso,
Tyrrhenusque fretis immittitur æstus Avernis.

Give some account of the public works here mentioned. By whom were they conducted, for what purpose, and at what times?

9. Describe the oscilla and the effects expected to be produced by them. Give some account of the festivals in honor of Bacchus.

Which of them was most probably alluded to in this Georgic?

10. Give the etymology of the words aruspex, almus, armentum, crepusculum, cespes, hostia, locuples, pecunia, pistor.

LATIN—PROSE.

1. What is meant by the process called *Divinatio?* Relate the circumstances which rendered such a process necessary in the case of Verres.

2. Translate into English—

Nuper quum in P. Gabinium vir fortissimus et innocentissimus L. Piso delationem nominis postularet, et contra Q. Caecilius peteret isque se veteres inimicitias jam diu susceptas persequi diceret, quum auctoritas et dignitas Pisonis valebat plurimum, tum illa erat causa justissima, quod eum sibi Achaei patronum adoptarant. Etenim quum lex ipsa de pecuniis repetundis sociorum atque amicorum populi Romani patrona sit, iniquum est non eum legis judiciique

actorem idoneum maxime putari quem actorem causae suae socii defensoremque fortunarum suarum potissimum esse voluerunt. An quod ad commemorandum est honestius, id ad probandum non multo vid eri debet aequius ? Utra igitur est splendidior, utra illustrior commemoratio ? Accusavi eum cui quaestor fueram, quicum me sors consuetudoque majorum, quicum me deorum hominumque judicium conjunxerat ? an, Accusavi rogatu sociorum atque amicorum ; delectus sum ab universa provincia qui ejus jura fortunasque defenderem ? Dubitare quisquam potest quin honestius sit eorum causa apud quos quaestor fueris quam eum cujus quaestor fueris accusare ?

3. Give a concise account of the constitution and procedure of the Courts called *Quæstiones Perpetuæ*. From what class were the *Judices* first chosen ? Mention, with dates, the changes in the Judicial order introduced by the laws of C. Gracchus, of Sylla, and of Cotta. Under which of these laws was the Court constituted for the trial of Verres ?

4. Translate into English, adding short explanatory notes where necessary,—

Cognoscet ex me populus Romanus quid sit quamobrem, quum equester ordo judicaret annos prope quinquaginta continuos, nullo judice equite Romano judicante ne tenuissima quidem suspicio acceptae pecuniae ob rem judicandam constituta sit ; quid sit quod judiciis ad senatorium ordinem translatis sublataque populi Romani in unumquemque nostrum potestate Q. Calidius damnatus dixerit, minoris HS tricies praetorium hominem honeste non posse damnari ; quid sit quod, P. Septimio senatore damnato, Q. Hortensio praetore, de pecuniis repetundis, lis aestimata sit eo nomine quod ille ob rem judicandam pecuniam accepisset ; quod in C. Herennio, quod in C. Popillio, senatoribus, qui ambo peculatus damnati sunt ; quod in M. Atilio, qui de majestate

damnatus est, hoc planum factum est, eos pecuniam ob rem judicandam accepisse; quod inventi sunt senatores qui, C. Verre praetore urbano sortiente, exirent in eum reum quem incognita causa condemnarent; quod inventus est senator, qui quum judex esset, in eodem judicio et ab reo pecuniam acciperet quam judicibus divideret, et ab accusatore ut reum damnaret?

What is the object of this part of the argument?

5. Describe the nature of the offences called *Repetundæ*, *Peculatus*, *Majestas*, *and Ambitus*.

6. Explain the meaning of the expressions *diem dicere*, *judicum rejectio*, *ampliatio*, *comperendinatio*, *litis æstimatio*.

7. Translate and explain—

"Impetrat a senatu ut dies sibi prorogaretur, quod tabulas suas ab accusatoribus Dolabellæ obsignatas diceret, proinde quasi exscribendi potestatem non haberet."

8. Translate—

"Ostendam in ædibus privatis, longa difficilique vectura, columnas singulas, ad impluvium HS quadragenis millibus non minus magnas locatas."

What is the *impluvium*? Explain the meaning of *HS quadragenis millibus*, and give the amount in Rupees.

9. Distinguish between *nummus* and *pecunia*; *facinus*, *crimen*, and *culpa*; *furtum* and *latrocinium*; *similis tui* and *similis tibi*; *lædere alicui* and *injuriam alicui facere*; *simulare* and *dissimulare*.

10. Translate into Latin

The public administration was at this time, in every branch of it, most infamously corrupt; the great, exhausted by their luxury and vice, made no other use of their governments than to enrich themselves by the spoils of the foreign provinces. Their business was to extort money abroad, that they might purchase offices at home, and to plunder the allies in order to corrupt the citizens.

(10.) Translate the following passage into Bengalee :—

Selim took possession of the government immediately on his father's death, and assumed the title of Jehanghir (Conqueror of the World).

He found the whole of his dominions on the north of the Nerbudda in a state of as great tranquillity as could be expected in so extensive an empire. The rebellion of Osman continued in Bengal, but was confined to part of that province. The contest with the Rana of Oudipur was a foreign war, and the success, though not complete, was on the side of the Emperor.

Jehanghir's first measures were of a much more benevolent and judicious character than might have been expected of him. He confirmed most of his father's old officers in their stations ; and issued edicts, remitting some vexatious duties which had survived Akbar's reforms, forbidding the bales of merchants to be opened by persons in authority without their free consent, directing that no soldiers or servants of the State should quarter themselves on private houses, abolishing the punishment of cutting off ears and noses, and

introducing other salutary regulations. Notwithstanding his own notorious habits, he strictly forbade the use of wine, and regulated that of opium; subjecting all offenders against his rules to severe punishment.

In the year 1011 he assembled all his troops, and marched against the king of Kanouge. The king did not even attempt resistance; he advanced and tendered his submission to the invader. Kanouge was consequently treated with lenity, and the conqueror remained only three days. After reducing several other places, he received intelligence of a city which afforded the means of gratifying to the utmost his rapacious piety. Mattura, sacred to Krishna, contained shrines eclipsing all others even in this most wealthy region. The conqueror entered it with little opposition, and found its temples the most splendid he had seen, filled with gigantic idols of pure gold, having eyes of rubies.

These alarms led to communications between the British and the Maratha princes, especially the Peshwa, with a view of ascertaining how far they were inclined to renew the war with Tippu, and various inducements were held out, to encourage them to enter into a confederacy for this object, should it become necessary. This proceeding was considered the more advisable as the Marathas had felt much aggrieved when Lord Cornwallis, departing from the policy of his predecessor, had declined, while at peace with Tippu, to afford any aid to his enemies.

5. Give the date of the first Roman Civil War; describe it briefly, and mention what result followed from it.

6. What circumstance led to the final division of the Roman Empire? Give the date of its taking place.

7. Give the date of the signature of Magna Charta; name its principal provisions, and note which of them still form a part of the law of England.

8. State the nature of the claims to the English crown, made by the houses of York and Lancaster respectively, which led to the war of the Roses. Which of the two does the constitutional law favour?

9. What was the nature of the Bill of Rights, when and why was it passed?

10. Name the present British colonies and possessions situated between the 30th and 50th parallels of North Latitude.

11. Describe briefly the nature of the British constitution as it was at the commencement of the present century, stating the functions and privileges of the Sovereign, the

Lords, the Commons, the Municipal Corporations, and the Judges.

HISTORY.

1. What changes took place in the political condition of the Jews between the return from Babylon and the Christian era?

2. Into what classes were the Hindús divided according to Menúe? Give his description of the Brahmanical class and compare it with the condition of the same class of the present day.

3. Discuss the evidence given by Elphinstone for fixing the era of Chandragupta.

4. State what you know of the internal and external commerce of the ancient Hindús. What evidence have we of Hindú settlements in Java and the neighbouring islands?

5. Give the date of the first Mahomedan invasion of India.

How far did the Mahomedans penetrate during the first 50 years?

How do you account for the slow progress of the Mahomedan arms in India compared with their rapid conquest of Persia?

6. What was the extent of the empire of Delhi at the commencement of the reign of Mohammed Toglak?—

What districts threw off the yoke of Delhi during his reign, and what kingdoms were formed on the dissolution of the empire under Mahmúd Toglak?

7. Describe Akber's revenue system as contained in the "Ayeni Akberi," stating its objects, with the means taken to secure them, and its advantages.

8. Describe the geographical position and the physica features of Maharashtra.

Explain the meaning of "chout."

9. Sketch the life of Nadir Shah.

10. Describe the nature of the revenue reforms made by Lord Cornwallis.

State their objects and shew their results.

MATHEMATICS.

1. If the interest on £130 15*s*. 10*d*. for 10 days be 3*s*. 7*d*. how much is that per cent. per annum ?

2. Define a logarithm, and prove that

$$\log xy = \log x + \log y\,; \quad \frac{\log_a x}{\log_b x} = \log_a b$$

Given $\log_{10} 2 = .3010300$, find $\log_{10} \sqrt[3]{.0125}$

3. Shew that b^2 is greater than, equal to, or less than ac, according as a, b, c, are in Arithmetical, Geometrical, or Harmonical progression.

4. The sum of the co-efficients of the odd terms in the expansion of $(1 + x)^n$ is equal to the sum of the co-efficients of the even terms.

Write down the r^{th} term of $(a^{-1}\ x - a\ x^{-1})^{-1}$

5. How many triangles can be formed by joining the angular points of a decagon, that is each triangle having three of the angular points of the decagon for its angular points.

6. Similar triangles are to one another in the duplicate ratio of their homologous sides.

7. If two planes, cutting one another, be each of them

perpendicular to a third plane, the common section shall be perpendicular to the same plane.

8. Express sin A and cos A in terms of sin 2 A, and explain how the signs of the radicals are to be determined in any particular case.

Write down formulæ which apply when A lies between 135° and 225.

9. Assuming the formula $\cos A = \frac{b^2 + c^2 - a^2}{2bc}$ find an expression for the area of a triangle in terms of its sides.

Simplify the expression in the case of an equilateral triangle.

10. Prove the formulæ $\tan \frac{A-B}{2} = \frac{a-b}{a+b} \cot \frac{C}{2}$

In a triangle where $\frac{a}{b} = \frac{5}{4}$ and the included angle C is 50°, find A and B, having given

$$\log 3 = .4771213$$
$$\log \cot 25° = 10.3313275$$
$$\log \tan 13° 24' = 9.3770030$$
$$\text{difference for } 60'' = .0005601$$

11. If the tangent at any point P of a parabola intersect the tangent at the vertex in Y then S Y bisects P T, (T being the intersection of the tangent with the axis) at right angles, and is a mean proportional between S A and S P.

12. In an ellipse if C P and C D be conjugate, prove that

$$(SP - AC)^2 + (SD - AC)^2 = SC^2.$$

13. If any chord of an hyperbola be produced to meet the asymptotes, the parts of it intercepted between the curve and the asymptotes will be equal.

NATURAL PHILOSOPHY.

1. Enunciate the following propositions :—

(1.) The Parallelogram of forces.

(2.) The Triangle of forces.

(3.) The Polygon of forces.

Apply the last proposition to the case of six equal forces, represented in magnitude and direction by the sides of a regular hexagon taken in order.

2. Find the relation between P and W in the first system of pullies, each pulley being of equal weight.

3. Define the centre of gravity of a body.

A square and a rectangle of uniform density are joined together in one plane at a common side: find the length of the rectangle in order that the two may balance about that side, the thickness of the square being double that of the rectangle.

4. How is accelerating force measured? If 32 be the measure of gravity when a second and a foot are taken as units of time and distance, what would be its measure if half a second and half a foot were taken as units?

5. Prove the formula $s = \frac{1}{2} ft^2$.

A, B, C, D are points in a vertical line, the lengths of AB, BC, CD, being equal: if a body falls from A, prove that the times of describing AB, BC, CD are respectively as

$$1 : \sqrt{2} - 1 : \sqrt{3} - \sqrt{2}$$

6. If a body floats in a fluid shew that it displaces as much of the fluid as is equal in weight to the weight of the body and that it presses downwards and is pressed upwards with a force equal to the weight of the fluid displaced.

A glass of water, in which a cork is floating, is placed in the receiver of an air pump and the air exhausted. Will the cork sink or rise?

7. Supposing that the height of a column of mercury in the common barometer is 30 inches, and that a siphon is used to convey mercury from one vessel to another, how high may the bend of the siphon rise above the level of the fluid to be conveyed without preventing the action of the instrument?

8. If a ray of light be reflected once by each of two plane surfaces in a plane perpendicular to their common intersection, the angle contained between the first and the last directions of the ray is equal to twice the angle between the reflectors.

9. Explain the nature of the critical angle. What is the greatest zenith distance a star can have when seen by an eye beneath the surface of still water?

10. Define the astronomical terms—Right Ascension, Declination, Azimuth, Altitude, Latitude, and Longitude.

11. Explain the phenomena of a total solar eclipse, and also why it is seen from so small a portion of the earth's surface.

PHYSICAL GEOGRAPHY AND ANIMAL PHYSIOLOGY.

I. Give a brief sketch of the mountain system of the globe.

II. What are the monsoons and upon what causes do they depend?

III. How may the islands of the globe be classified, and to what causes do they owe their formation?

IV. What is dew? What physical conditions tend to promote, and what to prevent its deposition?

V. Enumerate and briefly explain the principal causes which modify the climate of a country.

VI. What do physiologists understand by the term function?

VII. What functions are met with, more or less fully developed, in the animal kingdom, and how may they be classified?

VIII. Describe the phenomena of digestion in the class Mammalia.

IX. What are the principal modifications of the respiratory apparatus met with in the animal kingdom?

X. What do you conceive to be the difference between *intelligence* and *instinct?* Give some examples of the latter.

CHEMISTRY.

I. What do you understand, in chemical language, by the term *element* or *elementary substance;* how are the so-called elements usually classified, and upon what principles is the classification founded?

II. What is water,—chemically, physically, and physiologically?

III. Explain and illustrate the general laws of chemical combination.

IV. What constantly acting causes tend to modify the composition of the atmosphere, and how do you account for its uniformity in spite of them?

V. From what ore is lead usually obtained; by what method is its reduction accomplished, and what changes occur during the process?

VI. Describe and explain the action of *pure* and *spring* water respectively, upon metallic lead.

VII. What do you mean by an alloy? Mention some of the most practically useful, detailing their composition.

VIII. Find the volume which 120 cubic inches of oxygen at 78° Fah. would occupy at the standard temperature of 60° Fah.

IX. Describe the flame of an ordinary candle, and mention the products of its combustion.

X. What is the difference between *ignition* and *combustion;* illustrate your answer by a reference to the oxyhydrogen light?

MORAL PHILOSOPHY.

1. How do Mental and Moral Science differ? What is the object of Moral Science? Into what two parts may it be divided?

2. Define "Desire" and "Affections," and divide the Affections into classes.

3. Among which of our Active Powers would you place the Passions? How do you explain the fact that the word *Passion*, in popular usage, refers only to the Feeling of Resentment?

4. For the due operation of Moral causes on the Will, certain circumstances are required in the individual on whom they are to operate; what are those circumstances?

5. In deciding upon a moral question and carrying that decision into effect, what distinct forms of moral feeling exist?

6. In what did Bishop Butler make virtue to consist? What objections have been urged against his view of the subject?

7. How did Hume attempt to prove that Justice is an artificial and not a natural virtue? Granting Hume's argument, the obligation to Justice is not affected.

8. How far may we learn our Duty by the light of Nature?

9. In what does Attention consist? What aid may it derive from the Imagination? What influence has it in moral Decisions?

10. What are the truths which it is the immediate object of Faith to bring habitually before us?

11. What do you mean by the Right of Property? What are the different modes in which it may be violated?

12. What three things are essential in order to constitute Virtue in an Agent?

MENTAL PHILOSOPHY AND LOGIC.

1. Give a full and methodical classification of the various affections of the mind.

2. What grounds have we for believing that the Thinking Principle is, in its essence, independent of the Body, and will survive it?

3. Upon what does the certainty of a science depend? What marked distinctions are there between Medicine and the purely physical sciences?

4. What are the three primary laws of suggestion? Mention particular cases of suggestion included under each general law?

5. Upon the principle of suggestion, how are continuous plans of invention accounted for? On the same principle how do you account for practical habits?

6. What were the opinions of the Nominalists concerning (what are called) *abstract ideas?* State some of Brown's arguments against their hypothesis.

7. In what respect is there a *striking* analogy between the sciences of Logic and Arithmetic?

8. In what respect is the Analytical method of treating a subject superior to the Synthetical, and *vice versâ ?*

9. What are the subjects, and what the predicates in the following propositions,

(a) I hope to succeed.
(b) It is to be hoped that we shall succeed.

10. Upon what does the truth or falsity of a Conditional Proposition entirely depend ? What are the two Rules which hold with reference to Conditional Propositions ?

11. Prove that a Universal Affirmative Proposition can be deduced in the first figure only.

12. State and prove the rules about the quantity and quality of the Propositions of a Sorites.

13. Into what propositions are A, E, I and O respectively converted ? Prove your assertions.

14. Draw out a scheme showing the Division and Sub-Division of Fallacies.

15. Examine the following fallacies, and refer each to its proper logical head :—

(a) Nothing is heavier than Platina,
Feathers are heavier than nothing,
Feathers are heavier than Platina,

(b) Meat and drink are necessaries of life,
The revenues of Vitellius were spent on meat and drink,
The revenues of Vitellius were spent on the necessaries of life,

(c) He who calls you a man speaks truly,
He who calls you a fool calls you a man,
He who calls you a fool speaks truly.

(d) Induction is distinct from Syllogism,
Induction is a process of Reasoning,
There is a process of reasoning distinct from syllogism.

B. A. Honor Examination.

PHILOSOPHY OF RHETORIC.

Examiner,—Dr. Kay.

1. Rhetoric has strong affinities with Logic on the one side and with Poetry on the other. Point out (1) what it has *in common* with each; (2) how it *differs* from each.

2. What are the two branches of *persuasion*, as analysed by Campbell?

3. How many *different kinds* of oratory were recognised among the Greeks and Romans?

4. It is said, that rules for composition "cramp the mind." How far is this remark borne out (1) by what we know of the practice of the most eminent orators (e. g. Demosthenes, Cicero, Burke), (2) by the analogy of what occurs in other Arts, (e. g. Painting and Music).

5. Explain at large the importance of determining on which side the "burden of proof" lies: and illustrate the meaning of the remark, "It is difficult to prove a negative."

6. What is meant by an argument which "proves too much?" What by "excess of proof?"

7. It is said to be less easy to *defend* than to *accuse*. Why should it be so? How did Demosthenes in his speech "On the crown" escape from this difficulty?

8. What is the difference between a *cumulative argument* and *a chain of reasoning?*

9. An important remark is quoted from Aristotle by Archbishop Whately as to the *place*, which examples, precedents, testimonies, &c. should occupy in the arrangement of arguments?

10. Arguments which are most satisfactory to a thoughtful investigator are not always the best calculated to pro-

duce conviction in the minds of an audience, much less, to silence an opponent. How is this?

11. What should the *exordium* of a speech aim at? What rule (justly commended by Whately) did Cicero lay down about the framing of an exordium?

12. The first element of a good style is clearness or perspicuity, the second energy or vivacity. What is requisite for attaining each?

13. Point out the advantages of *antithesis* and the dangers of an antithetic style.

14. What explanation does Whately give of the feeling experienced by an orator when he is addressing a crowd?

LOGIC.

Examiner,—MR. MARTIN.

1. What are the two Canons, on which the validity of categorical syllogisms has been made to rest? Reid and others have protested against these canons; on what grounds?

2. How does Dr. Whately distinguish between Logical and Physical discoveries?

3. In a valid syllogism, if the arrangement of the major term be the same in the premise and the conclusion, the minor premise must be affirmative.

4. Show the validity of *Ad Impossibile* reduction. Determine in each of the figures which premise must be suppressed in effecting this reduction.

5. Distinguish between inferences *proper*, and inferences *improperly so called*. How does Mr. Mill divide the former?

6. Into what five classes are Fallacies divided by Mill? On what ground does he allow that "almost all fallacies may in strictness be brought" under his fifth class?

7. Sir William Hamilton charges Whately's exposition of "the nature and use of Logic" with being not only ambiguous but contradictory. What reasons does he assign for this statement?

8. What is meant by the Modality of Propositions and Syllogisms? What mistake has been made by Dr. Whately and others in discussing this subject?

9. Explain fully the relation between the *extension* and the *intension* of a term: and show how this distinction may be applied to effect three different analyses of syllogism.

10. The majority of practical arguments fall into the Third Figure?

11. What is the real cause why men reason in the form *camestres* or *cesare* in preference to *celarent?*

12. Examine the following arguments:—

"A tax on wages must fall on the labourer, for, if not, his wages must be proportionately raised, and so the price of goods will rise, which will cause another rise in wages, and so on, *ad inf.*:—which is absurd."

What was the old Greek sophism, to which this argument corresponds? What is the true solution of the sophism?

NATURAL THEOLOGY.

Examiner,—Dr. Kay.

1. What are the respective ideas which form the basis of the two departments of Natural Theology, viz. (1) Teleology; (2) Homology.

2. "In one instance only do we get behind phenomena, and in that one instance we find *mind*." What is the bearing of this remark on the argument of Natural Theology?

3. "Laws" of nature, far from explaining the arrangement (still less, the origination) of the phenomenal world

themselves imperiously demand an intelligent Lawgiver as their cause ?

4. Does the discovery of the "stability" of the Solar system weaken the argument of Natural Theology (as M. Comte thought) or confirm it ? Why ?

5. Point out, with some detail, how the upheavals of the earth's strata have tended to fit the earth for being the abode of man. What is the special force of geological facts in the teleological argument ?

6. Why have naturalists resorted chiefly to physiology for examples of design ?

7. Mention some of the striking marks of design in the disposition of the muscles of the human body.

8. Unity of design may be traced in vertebrate animals from the earliest Ichthyic period up to man. How does this fact illustrate the argument of Natural Theology ?

9. What is the precise nature of the evidence supplied by *Instinct ?* How does Paley show the futility of trying to resolve Instinct into sensation ?

10. Describe fully Marladi's discovery about the *ends* of bees' cells and the controversy to which it gave rise.

11. Give instances of the adaptation (1) of the parts of an individual organization to the whole ; (2) of species to each other ; (3) of the vegetable to the animal kingdom.

12. Mention the traces of design found (1) in the structure of the eye : (2) in the mutual adaptations of the eye, the sun, the atmosphere, and terrestrial objects.

13. Enumerate the causes which concur in the production of a single flower.

14. What, according to Dr. M'Cosh, is the prevailing arrangement of colours in plants ?

15. Mention some instances of *prospective contrivances* for the well-being of animals, provided long before they are wanted.

16. The pleasure which attends the exercise of the benevolent affections, furnishes an argument for believing in the goodness of God?

17. According to Dr. Tulloch, the highest adaptation of all is that which exists between "the order which shows Mind, and the mind which perceives order." Exhibit the argument at some length.

18. On what ground are we justified in receiving the positive evidences of divine goodness that meet us in Nature, and waiting for a future solution of aught that appears to run counter to it?

MORAL PHILOSOPHY.

Examiner,—MR. MARTIN.

1. Prove that there is a conscience and that conscience has authority? State the law by which conscience is governed and the manner in which its decision is expressed.

2. Classify and subdivide the duties which arise from the peculiar connexion that exists between man and his fellow creatures.

3. On what grounds do we assert that all men are under an obligation to love God supremely?

4. To what did Mandeville ascribe our impressions of moral rectitude? What is the great fallacy of his book? How did he account for human virtue? His followers must be unable to discriminate between certain very different desires; what are those desires?

5. What are the provinces of Reason and of Faith in the Philosophy of the Moral Feelings?

6. In what was Virtue made to consist?

(*a*) in the System of Plato

(*b*) in that of Aristotle

(*c*) in that of Zeno.

7. According to the Stoics, how ought we to act if we were in calamity? In what did the happiness of the Stoic consist? Shew that their two fundamental doctrines may be accounted for by the positions in life of their first promulgators?

8. Prove that a sense of duty cannot be resolved into a rational self-love? to what extravagant length did Hutchinson go in writing against Self-love?

9. How did Hutchinson account for our ideas of right and wrong? Shew that the sceptical conclusions deduced by later writers from his theory owe their origin to the peculiar class of illustrations which he himself made use of?

10. What are the fundamental errors on which the ethical System of Hobbes is built?

11. What are the merits, and what (according to Mackintosh) the defects of Bishop Butler's System of ethics?

12. Give Mackintosh's account of the nature of conscience and of the reason why it may be properly described as having a supremacy over other parts of our nature.

13. How would you deal with the statement that ethical analysis can no more lead men to goodness than anatomy can restore vigour to a palsied limb?

14. Does it follow that the study of Moral Philosophy is to be avoided, because "going over the theory of virtue in one's mind" *may* tend to produce insensibility to right motives? What is the *proper* inference?

MENTAL SCIENCE.

Examiner,—Dr. Kay.

1. The intuitions of the Reason have as much evidence and authority as the perceptions of sense.

2. It has been asserted that *knowledge* implies a union of the object and the percipient.—Show that this hypothesis is (1) groundless, (2) fruitless.

3. Reid and Stewart make consciousness a distinct faculty. What difficulty attends such a supposition ?

4. Point out how deeply Mental Science has been injured by its seeking to account for *ultimate facts*.

5. Sir W. Hamilton divides knowledge into intuitive and representative. Distinguish between the two classes.

6. Aristotle said ; " Intellect of itself sets nothing in motion." Examine this statement ;—pointing out the nature of the contrast which is so commonly recognized between " knowing" and " doing."

7. What is the relation between conception and imagination, according to Stewart and others.

8. What is Wordsworth's view of the distinction between Imagination and Fancy ?

9. What are the points of resemblance and what the points of contrast between Reason and Imagination ?

10. According to Sir W. Hamilton, Aristotle's statement of the laws of *suggestion* was more correct and comprehensive than any that has since been made ?

11. The three laws of suggestion (as commonly given) may all be resolved into one higher law ?

12. How does Stewart distinguish between memory and recollection ?

13. Brown in referring memory simply to the suggestive faculty, fell into a mistake similar to the *sensualistic* one so epigrammatically exposed by Leibnitz ?

14. The same charge lies against his account of Imagination ?

15. What other quality besides *vastness* is necessary for producing a sense of sublimity ?

16. What have been the opinions held by "men of genius" as to the nature of *genius?*

17. The maxim that "nothing can act where it is not" has been applied to the solution of the problem about the action of mind on matter. Shew (1) that the maxim being derived from physics cannot be applied to the above problem without a gross *petitio principii:* (2) that it is ambiguous, and cannot be admitted even in physics until such ambiguity has been removed: (3) that in its unambiguous form it is not only a mere truism but altogether irrelevant to the question in hand.

18. If *attention* is the mind's limitation of its action to a small range of object matter; and this self-limitation involves an exercise of the will, and the will is determined by motives, and the character of a man's motives depends on the state of his affections and his moral sensibility; what is the practical inference to be drawn (1) by the philosopher, (2) by the orator, (3) by the school-master.

PHILOSOPHY OF THE INDUCTIVE SCIENCES.

Examiner,—DR. KAY.

1. Illustrate briefly the following steps in the process of Induction:

(1) The decomposition of phenomena into elementary facts:

(2) The comparison, valuation, and adjustment of these facts:

(3) The binding together of facts by a conception:

(4) Testing of such conception by deductive applications.

2. What are the respective advantages of observation and experiment in supplying materials for Induction?

3. Observation (it is admitted) must be the basis of Induction; yet it is maintained that facts cannot be observed profitably by one who has not clear conceptions. How do you reconcile this seeming inconsistency?

4. How are we to understand Newton's remark, "*I do not frame hypothesis?*" Quote his own explanation of what he meant by *hypothesis;* and show that the maxim thus interpreted is not opposed to legitimate theorizing.

5. In the case of true Theories every change made in the theory to accommodate new facts tends to simplicity; in false theories, to complexity

(1) Exemplify this by a reference to Astronomy.

(2) Apply it to decide between the rival theories of light.

6. Some have contended that the Three Laws of motion were actually derived from experience; others that they are necessary, intuitive truths. Is there any way of harmonizing these two views?

7. Dr. Whewell asks: "*How many times* hotter than blood is boiling water?" What is the drift of the question? and how do you answer it?

8. What are the various hypotheses that have been assumed in explanation of the notion, *Polarity?*

9. Whewell remarks that the chemist who placed *sulphur* next to the *sulphurets*, fell into an error similar to one which prevailed among some ancient schools of philosophy. What error?

10. "Chemical affinity is *elective, and definite as to* quantity." Whewell maintains that these principles have more than experimental evidence to rest upon?

11. Point out (1) the merits of the atomic theory as a convenient hypothesis: (2) its defects as a philosophical theory.

12. English and French science borrows its terminology from the Greek; German science constructs its terminology from the vernacular. What are the advantages of each plan? Is it probable that Hindu science, by drawing on the Sanscrit, may *combine* those advantages?

13. Shew, by Cuvier's testimony about his own researches, that Bacon's warning against the admission of *Final causes* as a principle of reasoning must not be extended to the *organical* sciences.

14. It is sometimes taken for granted that there is an *a priori* probability in favour of the geological doctrine of Uniformity as against that of Catastrophes. Is it so?

15. Adamson argued that botanical genera are not natural groups, because they are incapable of exact definition. How do you meet this argument?

16. Show that a comprehensive study of the inductive sciences, far from favouring scepticism, tends to produce a habit of mind which is characterized by calm and courageous adherence to theory, so far as it is ascertained, whatever obscurity may still hang around portions of the theory.

B. L. Pass Examination.

JURISPRUDENCE.

Examiner.—J. GOODEVE, ESQ.

1. Define Jurisprudence.

2. What is Municipal law, and wherein does it differ from Moral law, and wherein from a law of Nature?

3. What are the sanctions on which Municipal Law is founded, as contra-distinguished from those on which Moral law rests?

4. What is meant by the Law of Nations, and on what obligation is it based? Distinguish it from the Comity of Nations?

5. What is the ordinary Common law of a Country; and wherein does it differ from its written law?

6. What is Natural Allegiance, and what Local? To what extent is the former a rule of permanent obligation, and the latter transitory?

7. What is Domicil? How is it acquired? Is it capable of being changed, and by what means; By what expression is domicil by birth technically described, and by what a substituted domicil?

8. In the instance of the death intestate of a party in a country different from that of his domicil at the time of his death, by the law of *which* Country is the succession to his personal estate governed?

9. Suppose the intestate, mentioned in the last question, to have left real estate, according to the law of *which* country would the succession to such real estate go?

10. What is meant by the expression "lex fori," what by that of "lex loci rei sitæ," and what by that of "lex contractus?"

11. In the instance of a suit having reference to a foreign subject matter, are the forms of procedure, and are the rules of evidence regulated by the course of the Court in which the suit is prosecuted, or by the laws of the foreign country?

12. In the case in which the subject matter referred to in the last question is immoveable property, which law governs questions affecting the title to the property, and which the form of its assurance, the "lex fori" or the "lex loci?"

13. In the case in which the subject matter is a con-

tract entered into in a foreign country, by what law is the validity of the contract determined, and by what its interpretation ?

14. In the case of a marriage contracted in one country by the subjects of another, in a form consistent with that of the former, but varying from that of the latter, as a general rule, is the marriage valid or invalid; and on what general principle ?

CRIMINAL LAW.

Examiner,—C. BOULNOIS, ESQ.

1. What is a crime ?

2. In cases of unsoundness of mind, what incapacity is an excuse for crime ?

3. What is the distinction between Principals in the first, and Principals in the second, degree ?

What is an accessary before, and what is an accessary after, the fact ? If A instigate B to kill C, and B intending so to do, by mistake kill another man, is A guilty of any crime, and if of any, of what crime ?

4. What is justifiable, and what is excusable, homicide ?

5. Distinguish between larceny, embezzlement, and fraudulent breach of trust.

If a sircar employed to collect money from his master's customers, fraudulently appropriate it as soon as it is paid to him, what offence does he commit ?

6. If A deliver goods to B by way of pledge, and before repayment of the advance made on them, fraudulently take them out of the possession of B, without his consent, is that larceny, and if so, why ?

7. If a banker speculate with money deposited in his bank and lose it, does he commit a criminal breach of trust ?

If he part with securities deposited with him for a special purpose, in fraud of the owner, is that a criminal breach of trust? Give reasons.

8. Define perjury?

9. What is forgery? does it include the fraudulent alteration of a true document?

10. In what way may a Sessions Judge, in trying a case, avail himself of the assistance of natives?

11. In what cases may a Judge disregard the futwa of the Mahomedan Law officer?

12. In what cases may a Magistrate refuse to admit a prisoner to bail under the Regulation law?

13. Describe the offence of dacoity under the Regulation law?

THE LAW OF CONTRACTS.

Examiner.—C. BOULNOIS, ESQ.

1. What is the difference between a contract by deed and a simple contract, in respect of the mode in which they are entered into, and what is the presumption with respect to the consideration in a contract of the first kind?

2. Under what circumstances, and on what principle, is an assignment by deed of a person's goods void as against his creditors? Why is such an assignment binding on the assignor in cases where creditors may set it aside?

3. When there are legal and illegal considerations for one entire contract, is the contract void?

If A give a bond to secure payment of a sum of money to B without expressing any consideration in the instrument, but, in fact, in order to induce B to stay certain proceedings against C for perjury, can B enforce payment of the bond? Give reasons.

If A for the same consideration, have paid money to B, can he recover it back ?

4. What is an implied contract ?

Entrance Examination.

ENGLISH—POETRY.

1. Mention the order in which Thompson's productions appeared, quoting the passage in which he refers to his earliest compositions.

2. The city swarms intense. The public haunt,
Full of each theme, and warm'd with mix'd discourse,
Hums indistinct. The sons of riot flow
Down the loose stream of false enchanted joy,
To swift destruction. On the rankled soul
The gaming fury falls; and in one gulf
Of total ruin, honour, virtue, peace,
Friends, families, and fortune, headlong sink.
Up springs the dance along the lighted dome,
Mix'd and evolved a thousand sprightly ways.
The glittering court effuses every pomp;
The circle deepens; beam'd from gaudy robes,
Tapers, and sparkling gems, and radiant eyes,
A soft effulgence o'er the palace waves:
While, a gay insect in his Summer shine,
The fop, light-fluttering, spreads his mealy wings.

Paraphrase these lines, keeping as closely as you can to the sense, and using as few of the author's words as possible.

3. Give an example of the Nominative absolute; and explain what is meant by Apposition and Antithesis.

4. Give the etymologies and meanings of these words: aghast, inured, horizon, beetling, effulgence, luculent, prolific, polished, scintillating.

5. ——————— on the passive main,
Descends the etherial *force* and with strong gust,
Turns from its bottoms the discolor'd *deep*.

Great Homer too appears, *of daring wing*,
Parent of song! and equal by his side
The British muse; joined hand in hand they walk,
Darkling, *full up* the middle steep to fame.

——————— How the emeralds glow'd
Where flush'd with power and vengeance, Pharaoh rode.
And stoled in white, those brazen wheels before
Osiris' ark his swarthy wizards bore.

Explain these passages clearly, giving the allusions, and parse the words in Italics.

6. Compare—bad, gay, many, little, often, pretty, far, old.

7. Give the past tense and past participle of am, bid, cost, sit, go, lie, ring.

2. "The species of bill, which belongs to the birds *that* live by suction, deserves to be described in *its* relation to *that* office. *They* are what naturalists call serrated or dentated *bills;* the inside of them, towards the edge, being thickly set with parallel or concentric rows of short, strong sharp-pointed prickles. These, though they *should be called* teeth, are not for the purpose of mastication, *like* the teeth of quadrupeds, nor yet, *as* in fish, for the *seizing* and retaining *their prey*, but for a quite different use. They form a filtre."

Parse the words in Italics. And explain the meanings of *serrated, dentated, concentric, mastication, filtre.*

Give full explanations of the meaning of the following passages.

(a) "Pride is seldom delicate, it will please itself with very mean advantages; and envy feels not its own happiness but when it may be compared with the misery of others."

শকুন্তলা শুনিয়া মনে মনে সাতিশয় শঙ্কিত হইয়া এই ভাবিতে লাগিলেন, না জানি আর্য্যপুত্র কি বলেন। রাজা দুর্ব্বাসার শাপপ্রভাবে শকুন্তলাপরিণয়বৃত্তান্ত আদ্যোপান্ত বিস্মৃত হইয়াছিলেন, সুতরাং শুনিয়া বিস্ময়াপন্ন হইয়া কহিলেন এ আবার কি উপস্থিত। শকুন্তলা শুনিয়া এক-

বারে ম্রিয়মাণা হইলেন। শার্ঙ্গরব কহিলেন মহারাজ! আপনি লৌকিক ব্যবহার বিলক্ষণ অবগত হইয়াও এরূপ কহিতেছেন কেন? আপনি কি জানেন না যে পরিণীত নারী যদিও অত্যন্ত সাধুশীলা হয়, তথাপি সে নিয়ত পিতৃ-কুলবাসিনী হইলে লোকে নানা কথা কহিয়া থাকে। এই নিমিত্ত সে পতির অপ্রিয়া হইলেও তাহার পিতৃপক্ষীয়েরা তাহাকে পতিকুলবাসিনী করিতে চাহে।

Answer the following questions in Bengali:—

১। "আর্য্যপুত্র, শাপপ্রভাবে, শকুন্তলাপরিণয় বৃত্তান্ত," এই তিনটি পদের অর্থ কর; এই তিন পদে কোন সমাস আছে কি না? যদি থাকে, কোন্ পদে কি সমাস হইয়াছে বলিয়া দাও? এই তিন পদের কোন্ পদে কি কারক আছে তাহাও লিখিয়া দাও।

২। "সুতরাং শুনিয়া বিস্ময়াপন্ন হইয়া কহিলেন," এ স্থলে সুতরাং এই পদ প্রয়োগ করা হইয়াছে কেন? কে বিস্ময়াপন্ন হইলেন? বিস্ময়ের কারণই বা কি?।

৩। "শকুন্তলা শুনিয়া একবারে ম্রিয়মাণা হইলেন," এ স্থলে ম্রিয়মাণা শব্দের অর্থ কি? ম্রিয়মাণা, ইহা বিশেষ্য কি বিশেষণ পদ?

৪। "মহারাজ! আপনি লৌকিক ব্যবহার বিলক্ষণ অবগত হইয়াও এরূপ কহিতেছেন কেন" লৌকিক ব্যবহার শব্দের যথার্থ অর্থ কি? কিরূপ ব্যবহারকে লৌকিক ব্যবহার কহে? গ্রন্থ মধ্যে তাহার কোন উদাহরণ দেখান হইয়াছে কি না?

৫। "পরিণীতা, সাধুশীলা, পিতৃকুলবাসিনী," এই তিনটির প্রতিশব্দ দিয়া অর্থ লিখ।

Meantime Mahmoud received the mortifying intelligence that the submission and alliance of the king of Kanowge had proved fatal to that prince. Indignant at his desertion of the general cause, Nunda, king of Callinger, seconded by the neighbouring monarchs commenced a furious war, which ended in his defeat and death, and the surrender of his capital. Mahmoud made all the despatch which his distance admitted. After forcing the passage of the Jumna, he advanced and found the victor strongly entrenched and apparently waiting his attack; but after due consideration, the Indian prince retreated, leaving the country to be laid waste by the invader. The kingdom and city of Kanowge, however were never able to regain their ancient splendour.

Having destroyed Shah Soojah, Meer Jumla became Soobadar of Bengal.

He seized on part of Assam, and sent an army down the Burrampooter and plundered Dacca.

The Rajah was obliged to seek refuge in the woods—the capital was taken, and the name changed to Alumnuggur.

He was not only friendly to the Europeans while he ruled Bengal but he did not forget their interests when he was removed.
